E-commerce Implementation

If you are looking to build an e-commerce website where you want to sell products, shopping cart implementation is necessary. To add a shopping cart to a new or existing website would be \$350. Buttons and the shopping cart pages are absolutely customizable to fit your website so that the user never knows he/she has left your site to make his/her payment. Database Implementation incurs an additional fee.

:: Custom Shopping Cart System Features ::

- Branded with your business name
- Customer and Product databases belong to you - Databases are custom developed to contain the information that you need.
- Customized product display - Product images and information displayed the way you want to present them.
- Customized ordering system - All ordering with the exception of credit card processing is done within your web site so you have complete control over the process. **Merchant Account and Payment Gateway or PayPal™ required for credit card processing.
- Customized web page layouts - The shopping cart system pages are designed to have the look and feel of the rest of your web site. Navigation within your entire web site is maintained.
- Custom email receipts for you and the customer.
- Custom "Thank You" page. Your customers are always returned to your web site after the credit card transaction process.
